

DYLAN VANALLEN

April 2, 2021

Dear Sir/Madam,

My name is Dylan VanAllen, and I am double majoring in physics and computer science at the University at Albany with a minor in mathematics. I am expecting to graduate in May 2022. I am very interested in this position as it aligns with my goals and aptitudes. I have completed courses with material in the structure of matter and waves in physics as well as lab courses in these subjects. I also have nearly ten years of coding experience and have completed courses in Java, python, algorithms, and numerical data analysis. I will be available full time beginning early May and am very eager to find an internship that matches my skills and talents. If you need any further information or have any questions do not hesitate to contact me.

Sincerely,

Dylan Jay VanAllen
